

Is your company prepared for the new written permit-required confined space program requirements for construction?

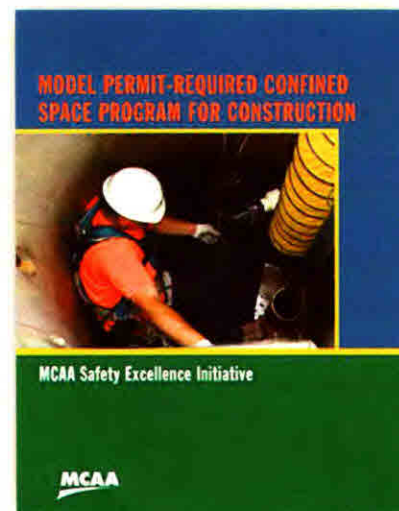

***Model Permit-Required Confined Space Program for Construction* makes it easy to create the programs your company needs for worker protection and compliance.**

OSHA's new standard on *Confined Spaces in Construction* requires employers to establish written permit-required confined space programs under specified circumstances. These programs help employers protect their workers from confined space hazards and **comply with the OSHA standard, which becomes enforceable on October 2.**

This new MCAA safety resource includes:

- A model permit-required confined space program;
- A confined space entry preparation checklist;
- A model permit-required confined space permit;
- A side-by-side comparison of key differences between OSHA's construction and general industry confined space standards; and
- A summary of OSHA's *Confined Spaces in Construction* standard.

The model program is free to members as a benefit of membership. To download your copy, visit www.mcaa.org/store. While you're there, explore the full range of safety resources that will help you protect your workers from injury and comply with applicable safety regulations.
