

PREPS

Program for Resource Efficiency in Private Schools

www.PREPSprogram.com

Use energy efficiency funds to help you promote gas equipment improvements within private schools, colleges, universities or trade schools!

PREPS provides services to help your customers identify, evaluate and implement energy efficient gas projects at **no cost to program participants**. PREPS also provides cash rebates for qualifying equipment, with additional **bonuses** for early commitment and timely installation. Rebates can help offset the initial costs of installing the equipment, improving the project's return on investment and encouraging customers to take action.

A list of the types of equipment for which rebates are offered is as follows:

- Water heaters
- Boilers
- Steam traps
- Pool boilers
- Tankless water heaters
- Tank and pipe insulation
- Pool covers
- Natural gas food service equipment
- Custom projects that provide quantifiable energy savings (i.e. heat recovery systems, etc.)

PREPS staff works with you and your customers throughout the incentive process, identifying equipment and helping with paperwork to make participation easy.

For more information on how PREPS can help you, call the PREPS staff at 888-683-5411 or email us at PREPS@rsgroup.com.

PREPS is funded by California utility customers and administered by The Southern California Gas Company® (SoCalGas) under the auspices of the California Public Utilities Commission. California customers who choose to participate in this program are not obligated to purchase any additional services offered by the Contractor.
